## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-44 are allowed.
2. The following is an examiner's statement of reasons for allowance: in the environment of a data sonde for use in horizontal drilling, the data sonde comprising, an emitting means for emitting a first signal, the first signal comprising zero and non-zero emission components in different periods and a receiving means for receiving an intermittent second data signal during first signal zero emission periods.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Albert et al '548 and Dallas et al '116 disclose a data sonde for use in horizontal drilling and a transmission means for transmitting an electromagnetic signal. Ripolone et al '743 discloses a high-speed communication for measuring while drilling having a full-duplex communication means. However, prior art does not address the method of communication as discloses by the present application. Fling et al GB 2 404 393 A is published foreign application of the same invention.
